DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

II. Claims 1-66 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyaoh et al., US No. 6,682,080 ("Miyaoh").

A. In short, Miyaoh discloses a gasket (Fig. 1) comprising a relatively rigid carrier.

There is a resilient sealing material (22) substantially more flexible than the carrier disposed on at least portions of the laterally extending sides. There is a longitudinally flexible inner sealing portion (generally 13) being longitudinally offset relative to the remainder of the carrier (generally 10). There is a longitudinally flexible outer stopper portion (12) spaced laterally away from the gasket opening.

B. The flexible stopper member has an resilient material (22) disposed within and at least partially filling a concave side (Fig. 1).

C. The carrier is form of a metal containing material (see cross-hatching).
